## ◆ CONTENTS

<b>1. Introduction</b>	<b>3</b>
<b>2. Contracts checked</b>	<b>3</b>
<b>3. Audit Process</b>	<b>3</b>
<b>4. Issues</b>	<b>4</b>
4.1 High relevance issues	4
4.2 Medium relevance issues	4
4.3 Low relevance issues	4
<b>5. Conclusion</b>	<b>5</b>

## ❖ INTRODUCTION

*This report has been prepared for Audible Project*

Name	DogeMode
Audit date	2022-10-04 - 2022-10-04
Language	Solidity
Network	Binance Smart Chain

## ❖ CONTRACTS CHECKED

Name	Address
DogeMode	0x6894142aee7237a47487b99085d339a03b4ee400

## ❖ AUDIT PROCESS

The code was audited by the team according to the following order:

### Automated analysis

- ❖ Scanning the project's smart contracts with several publicly available automated Solidity analysis tools
- ❖ Manual confirmation of all the issues found by the tools

### Manual audit

- ❖ Thorough manual analysis of smart contracts for security vulnerabilities
- ❖ Smart contracts' logic check

## ❖ ISSUES

### High relevance issues

- high relevance issues found

### Medium relevance issues

- medium relevance issues found

### Low relevance issues

#### 3. Emission rate not limited

The owner of the MasterChef can set an arbitrary log value for emission rate. The emission rate must be capped.

```
function updateMasterChefLogValue(_tokenId, _tokenId) external onlyOwner {
    _tokenId = _tokenId;
    emit updateMasterChefLogValue(_tokenId, _tokenId);
}
```

**Recommendation:** cap the emission rate.

## ✦ Conclusion

In order to find out about issues in your contracts,  
you can request an audit on
